EDUCATION

Texas A&M University **College Station, TX**
Bachelor of Science in Geographic Information Science and Technology *Expected December 2026*

Relevant Coursework: GIS Programming, Geodatabases, Remote Sensing, Digital Image Processing, Data Analysis, Global Navigation Satellite Systems, Cartography & Visualization, Information Science, Geography of Terrorism

EXPERIENCE

Quiddity Engineering **June 2026 - August 2026**
GIS Intern - Katy, TX

- Supported migration of enterprise GIS infrastructure from AWS to Azure for utility clients, helping modernize cloud-hosted Web GIS and Utility Network architecture.
- Developed standardized GIS basemap datasets from county sources, including district boundaries, tax parcels, plats, sections, street centerlines, county ownership, commercial properties, and LiDAR-derived building footprints.

Transportation Services **August 2025 - May 2026**
GIS Student Technician - College Station, TX

- Digitized campus road paint features, corrected existing data onto a new projection, and overhauled geodatabase infrastructure to support the addition of bike lanes on campus.
- Produced layouts, Operations Dashboards, and StoryMap visualizations supporting infrastructure planning and situational awareness.

Transportation Services **May 2025 - August 2025**
GIS Intern - College Station, TX

- Audited handicap parking compliance on the Texas A&M campus, conducting site visits and collecting over 40,000 field data points for spatial analysis.
- Automated geoprocessing workflows with Python and SQL, reducing manual processing time by 80%.

LEADERSHIP & INVOLVEMENT

Century Men's Society at Texas A&M **January 2023 - Present**
Philanthropy Chair

- Chaired external philanthropy competitions, managed budgets and schedules, and won over $11,000 for our philanthropy, Camp Kesem.
- Chaired and developed a 5k philanthropy race, organizing 100+ members and raising over $4,000 for Camp Kesem.

Freshman Leaders in Progress **August 2023 - May 2024**
Treasurer

- Managed a $16,000 annual budget.

PROJECTS

Change Detection of Artificial Islands

- Performed temporal geospatial analysis of islands in the South China Sea using Landsat 8 and Sentinel-2 imagery to analyze artificial island expansion from 2013–2024.
- Developed an image preprocessing workflow in ArcGIS Pro, including band compositing, cloud masking, raster clipping, and NDWI spectral generation.

Lunar Colony Site Suitability

- Created StoryMap and Dashboards visualizations of Lunar Reconnaissance Orbiter DEM and temperature data to map and grade potential colony sites based on proximity to crater ice and communication visibility with Earth.

SKILLS & ACTIVITIES

Technical: ArcGIS Pro, ESRI Suite, ENVI, AWS, Azure, Microsoft Office Suite, Databricks, Python, SQL, R, Arcade
Other: Spanish Speaker (Intermediate)
Activities: The Big Event, Fish Camp Counselor, 250+ Volunteer Hours
